Pricing Model

Our pricing models are flexible.

FTE Model Pricing (Charges & Payment/Denial posting)

At very nominal cost per month what you get is a full-time virtual healthcare claims processing professional who caters to all of your billing requirements and can go that extra mile in making sure the reimbursements targets are met every time.

FTE Pricing (AR follow-up and Denial Management)

Our AR follow-up and denial management expert will exhaust all their efforts to resolve the denial. These AR experts are trained to think out of the box and explore every possible opportunity to get the claim paid. If you want to hire a dedicated resource for your project. It is an ideal pricing option to handle AR follow-up and Denial Management.

Outcome Based Pricing Model:

This basically means we will earn only if you earn or make Profit. This is a pricing model where Aarin RCM will be paid for its services based on the business result achieved for you by our contribution. We usually charge 4% of collection per account per month. This pricing model does not support patient follow-up/collections.

Transaction Based Pricing Model:

This refers to a pricing model where payment to service provider is based on the number of transactions processed by us. We do not have variation in pricing based on volume. This means we will be paid for the amount of work processed by our resources. We provide a Schedule of Fees for the services we provide, on request.
